We are pleased to inform you that during the year under review the Company i.e. B. P. Capital Limited has started with the procedure of Merger with Diamond Footcare Udyog Private Limited and has applied to Bombay Stock Exchange (BSE) for obtaining its principal approval for the same.

Capital Limited was registered as NBFC Company with RBI but was not carrying any major activity for long hence the shareholders of the Company are not getting any return on their investment. Further, the Company had also surrendered its NBFC certificate with RBI. Diamond Footcare Udyog Private Limited (DFUPL) is one of the leading footwear manufacturer in India. The management of the two Companies decided to consolidate the two companies to take advantage of listing and liquidity for the footwear business, which has potential to grow much faster if sufficient working capital is made available. With this objective, the management of DFUPL has acquired the management and control of BPCL by giving an open offer in terms of SEBI (SAST) Regulations, 2011 and also decided to surrender the NBFC Licensee of BPCL to initial the footwear business in it. The merger of the two companies would substantially strengthen the balance sheet of the DFUPL and shall create a larger and financially stronger entity, which will have better resources for business growth and expansion.

The consolidation of DFUPL business (along with all the assets and liabilities) with BPCL, would at one hand strengthen the financials of the listed entity for the benefit of all its stakeholders and on the other hand help the footwear business of Transferor Company in raising funds for expansion due to the listed status.

The other benefits likely to arise through the proposed amalgamation are as follows:

- I. Financial strength and flexibility for the BPCL, which would result in maximizing overall shareholder value, and will improve the competitive position of the combined entity.
- II. Achieve greater efficiencies in operations with optimum utilization of resources, better administration and reduced cost.
- III. Improved organizational capability and leadership arising from pooling of financial, managerial and technical resources.
- IV. Better management and focus on growing the businesses.
- V. The amalgamation would result in reduction of overheads, administrative, managerial and other expenditure and bring about operational rationalization, efficiency and optimum utilization of various resources.

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

INDUSTRY AND ECONOMY OVERVIEW

Economic growth of around 7½% makes India the fastest-growing G20 economy. The acceleration of structural reforms, the move towards a rule-based policy framework and low commodity prices have provided a strong growth impetus. Recent deregulation measures and efforts to improve the ease of doing business have boosted foreign investment. Investment is still held back by the relatively high corporate income tax rates, a slow land acquisition process, regulations which remain stringent in some areas, weak corporate balance sheets, high non-performing loans which weigh on banks' lending, and infrastructure bottlenecks. Quality job creation has been low, held back by complex labour laws.

India's gross domestic product (GDP) grew by 7 per cent year-on-year in October-December 2016 quarter, which is the strongest among G-20 countries, as per Organisation for Economic Co-operation and Development (OECD) Economic Survey of India, 2017. According to IMF World Economic Outlook Update (January 2017), Indian economy is expected to grow at 7.2 per cent during FY 2016-17 and further accelerate to 7.7 per cent during FY 2017-18.

The tax collection figures between April 2016 and January 2017 show an increase in Net Indirect taxes by 16.9 per cent and an increase in Net Direct Taxes by 10.79 per cent year-on-year, indicating a steady trend of healthy growth. The total number of e-filed Income Tax Returns rose 21 per cent year-on-year to 42.1 million in 2016-17 (till 28.02.17), whereas the number of e-returns processed during the same period stood at 43 million.

Corporate earnings in India are expected to grow by over 20 per cent in FY 2017-18 supported by normalisation of profits, especially in sectors like automobiles and banks, while GDP is expected to grow by 7.5 per cent during the same period, according to Bloomberg consensus.

India has retained its position as the third largest startup base in the world with over 4,750 technology startups, with about 1,400 new start-ups being founded in 2016, according to a report by NASSCOM.

India's labour force is expected to touch 160-170 million by 2020, based on rate of population growth, increased labour force participation, and higher education enrolment, among other factors, according to a study by ASSOCHAM and Thought Arbitrage Research Institute.

India's foreign exchange reserves stood at US\$ 366.781 billion as on March 17, 2017 as compared to US\$ 360 billion by end of March 2016, according to data from the RBI.

As per the first Advance Estimates (AE) released by the CSO, the Indian economy is estimated to register a GDP growth rate of 7.1 per cent in 2016-17. (There is a likelihood of this growth being revised downwards in the subsequent revisions carried out by the CSO). The growth in the second half of 2016-17 works out to 7.0 per cent as against 7.2 per cent in the first half (Figure 1). The first AE released by CSO in early January 2017 were arrived at based on data mainly up to October and in some cases up to November 2016 and hence largely mirror the economic situation during the first seven to eight months of the financial year.

The Government of India announced demonetisation of high denomination bank notes of Rs 1000 and Rs 500, with effect on November 8, 2016, in order to eliminate black money and the growing menace of fake Indian currency notes, thereby creating opportunities for improvement in economic growth.

In the Union Budget 2017-18, the Finance Minister, Mr Arun Jaitley, verified that the major push of the budget proposals is on growth stimulation, providing relief to the middle class, providing affordable housing, curbing black money, digitalisation of the economy, enhancing transparency in political funding and simplifying the tax administration in the country.

India's unemployment rate has declined to 4.8 per cent in February 2017 compared to 9.5 per cent in August 2016, as a result of the Government's increased focus towards rural jobs and the Mahatma Gandhi National Rural Employment Guarantee Act (MGNREGA) scheme.

The Government of Maharashtra has set a target to double farm income by 2022 through measures like large scale micro irrigation, water conservation, expansion of formal cash credit coverage, crop insurance and agriculture diversification, as per Mr Vidyasagar Rao, Governor of Maharashtra.

Numerous foreign companies are setting up their facilities in India on account of various government initiatives like Make in India and Digital India. Mr. Narendra Modi, Prime Minister of India, has launched the Make in India initiative with an aim to boost the manufacturing sector of Indian economy, to increase the purchasing power of an average Indian consumer, which would further boost demand, and hence spur development, in addition to benefiting investors. The Government of India, under the Make in India initiative, is trying to give boost to the contribution made by the manufacturing sector and aims to take it up to 25 per cent of the GDP from the current 17 per cent. Besides, the Government has also come up with Digital

India initiative, which focuses on three core components: creation of digital infrastructure, delivering services digitally and to increase the digital literacy.

OPPORTUNITIES

- The reform in the bankruptcy laws for exits of various corporations to release locked up resources for which the Government has already reformulated an 'Insolvency and Bankruptcy Code, 2016' and now, its efficient implementation will matter the most.
- Strengthening of the legal basis for Aadhaar scheme and allow inter-operability to encourage digitalization payments for the efficient functioning of government schemes to achieve inclusion and equity. Now, the Aadhaar scheme has a legal backup through the Aadhaar Act, which is already passed by the Parliament.
- The focus of the government should be on competitive and cooperative federalism which presents a great potential to attract skills, investment and technology.
- The Government should focus on those agendas of structural reforms which are yet to be finished after the demonetisation drive of high-value currencies.
- The higher growth prospects in developed countries like the US and Germany can generate a new avenue for exports from developing countries including India.
- In the milieu of promoting labour-intensive exports, after the issue of Brexit, India has the better prospect of renegotiating free trade agreements with the UK and Europe and gain substantially for export and employment growth.
- The demographic dividend in the Peninsular States would reach the peak around 2020, but the Hinterland States would reach the peak only around 2040. Thus, the demographic dividend would be enjoyed by the country over a much longer duration than most other countries. This also offers a natural opportunity to close the economic gap existing across the states over time. This aspect offers a specific perspective on the urgency to pursue relevant economic reforms to maximise such a gain.
- There is an opportunity to create a Public Sector Asset Rehabilitation Agency to address the twin balance sheet problem by taking up large and difficult cases and taking tough decisions.

THREATS

- When it comes to the rating agencies, India, unfortunately, has a threat because with almost unrevised ratings over the last seven years, but its performance has significantly improved over the last few years.
- The competitive populism in the federal democracy can damage fiscal discipline and governance standards.
- The international political order and environment are fast changing towards isolation and protectionism. The mood of anti-globalisation regarding the goods, services and labour prevails in advanced economies. This could effectively close a potent option of achieving 15-20 per cent export growth in India to realise its overall growth potential of 8-10 per cent GDP growth over time.
- Challenges arising out of pay revisions and UDAY bonds are significant concerns for states to maintain their fiscal discipline targets.
- If the rising dollar on account of developments in the US economy results in the dollar induced depreciation in Yuan, it may lead to substantial structural transformation and disruptions in China that can have adverse spillover effects on Indian trade and investment. The potential US-China trade war could destabilise the world economy.
- International oil prices are on the rise and so also the commodity prices. However, the Survey fails to recognise likely problems of slippages in oil production on one hand and the threat of shale gas production in the USA on the other hand, which can effectively constrain the oil price rise.
- As a consequence of developments in the US economy, global interest rates and inflation rates in advanced countries are on the way to strengthen. This can have an adverse impact on India's capital inflow and outflow and hence on its investment climate.
- The stat shows that the world exports to GDP ratio have been declining for the last 6 years. So, under such an ominous environment, raising the share of India's exports in the world exports is likely to be very challenging. India's competitiveness in the world market is seriously threatened by emerging countries such as Vietnam, Bangladesh and Philippines. These emerging countries pose competition to India in a wide range of our export commodities and services.
- The demographic dividend India is likely to retreat soon because the peak is likely to be attained by 2020 and the peak is relatively lower than the one reached in China and Brazil.

OUTLOOK

India's economy became the world's fastest growing major economy in the last quarter of 2014, surpassing the People's Republic of China.

The long-term growth prospective of the Indian economy is positive due to its young population, corresponding low dependency ratio, healthy saving and investment rates, and increasing integration into the global economy. The Indian economy has the potential to become the world's 3rd-largest economy by the next decade, and one of the two largest economies by mid-century. The International Monetary Fund (IMF) described the Indian economy as the "bright spot" in the global landscape. India topped the World Bank's growth outlook for the first time in fiscal year 2015–16, during which the economy grew 7.6%. Growth is expected to have declined slightly to 7.1% for the 2016–17 fiscal year. According to the IMF, India's growth is expected to rebound to 7.2% in the 2017–18 fiscal and 7.7% in 2018–19.

India has one of the fastest growing service sectors in the world with an annual growth rate above 9% since 2001, which contributed to 57% of GDP in 2012–13. India has become a major exporter of IT services, Business Process Outsourcing (BPO) services, and software services with \$167.0 billion worth of service exports in 2013–14. This is the fastest-growing part of the economy. The IT industry continues to be the largest private-sector employer in India. India is the third-largest start-up hub in the world with over 3,100 technology start-ups in 2014–15. The agricultural sector is the largest employer in India's economy but contributes to a declining share of its GDP (17% in 2013–14). India ranks second worldwide in farm output. The industry sector has held a steady share of its economic contribution (26% of GDP in 2013–14). The Indian automobile industry is one of the largest in the world with an annual production of 21.48 million vehicles (mostly two and three wheelers) in 2013–14. India had \$600 billion worth of retail market in 2015 and one of world's fastest growing e-commerce markets.

India's two largest stock exchanges, Bombay Stock Exchange and National Stock Exchange of India, had a market capitalisation of US\$1.71 trillion and US\$1.68 trillion as of February 2015, which rank 11th and 12th in the world according to the World Federation of Exchanges. India is also home to the world's third-largest billionaires pool with 111 billionaires in 2016 and the fourth-largest number of ultra-high-net-worth households that have more than US\$100 million.

According to PWC's Report *The World in 2050*, India's nominal GDP could outpace the United States', making India the world's largest economy as early as 2040. The projection also sees India doubling its GDP from around \$2.2 trillion to about \$5 trillion by 2025. These estimates result from two significant metrics. Firstly, recent economic booms in states like Maharashtra and Karnataka have contributed to an overall national nominal GDP exceeding \$1 trillion in the late 2000s. Secondly, the median age for an Indian citizen is 27, leading projections to estimate a dependency ratio of .4 in the coming decades. These two facets drive diverse private sector growth and contribute to a robust Indian workforce.

By 2025, median Indian household income could approach \$4.1K. The PWC clarifies this as a 125% growth in GDP per capita.

ROAD AHEAD

According to The World Bank, the Indian economy will likely grow at 7 per cent in 2016-17, followed by further acceleration to 7.6 per cent in 2017-18 and 7.8 per cent in 2018-19. Demonetisation is expected to have a positive impact on the Indian economy, which will help foster a clean and digitised economy in the long run, according to Ms Kristalina Georgieva, Chief Executive Officer, The World Bank.

India is expected to be the third largest consumer economy as its consumption may triple to US\$ 4 trillion by 2025, owing to shift in consumer behaviour and expenditure pattern, according to a Boston Consulting Group (BCG) report; and is estimated to surpass USA to become the second largest economy in terms of purchasing power parity (PPP) by the year 2040, according to a report by PricewaterhouseCoopers. Also, the Prime Minister, Mr Narendra Modi has stated that India has become the world's fastest growing large economy, and is expected to grow five-fold by 2040, owing to a series of policy measures.

RISK & CONCERNS

India is better placed than many of its emerging market peers in terms of growth, and it is external factors such as the US rate tightening and a slowdown in China that pose greater risks to the economy than the sluggish pace of domestic reforms.

Investors see India as much better placed in terms of growth than most of its similarly rated emerging market peers, such as Indonesia, Turkey, Brazil, South Africa and Russia,.

In a poll conducted by Moody's and its Indian affiliate, Icra, 35% of the respondents saw external shocks as the key hurdle to India's economy, up from 10% when the survey was conducted in May 2015.

On threats to India's GDP growth, 32% of the respondents thought sluggish reform momentum as the greatest threat, down from 47% in May 2015. In contrast, 19% (38% in May 2015) said infrastructure constraints were the most important factor.

The poll also found that market concerns over India's (Baa3 positive- lowest notch of investment grade rating) economic exposure to external risks have risen over the past seven months.

The market participants we surveyed are increasingly concerned about the potential spillover on India's growth story of external risks such as interest rate tightening in the United States and China's ongoing slowdown.

On the asset quality of Indian banks, the market participants polled were split on whether government initiatives will help improve the banks' asset quality, with 40% expecting a reduction in weak assets in the coming 12-18 months compared with 45% who believe asset quality is unlikely to improve. Moody's says the capital buffers for publicsector banks will remain thin, with core capital ratios in the 6%-10% range.

As for outlook for Indian corporates, 50% of the respondents polled said policy implementation will represent the key driver of credit conditions for companies in India over the next 12-18 months, and 21% said external risks will constitute the key driver.

B. Remuneration to KMPs and other employees

The policy on remuneration for KMPs and other employees is as below:-

1. Fixed pay

The remuneration and reward structure for employees comprises two broad components - annual remuneration and long-term rewards. The Committee would determine the remuneration of the Directors and formulate guidelines for remuneration payable to the employees.

These guidelines are as under:

a) Annual remuneration

Annual remuneration refers to the annual compensation payable to the employees of the Company. This comprises two parts - a fixed component, and a performance-linked variable component based on the extent of achievement of the individual's objectives and performance of the business unit. Employee is required to determine his/her key result areas for that particular defined role. The performance-linked variable pay will be directly linked to the performance on individual components of the performance and the overall performance of the business. An employee's variable pay would, therefore, be directly dependent on key performance measures that represent the best interests of shareholders.

The objective is to set the total remuneration at levels to attract, motivate, and retain high-caliber, and high potential personnel in a competitive global market. The total remuneration level is to be reset annually based on a comparison with the relevant peer group globally, established through independent compensation surveys, from time to time.

b) Long-term rewards

Long-term rewards may be granted to eligible key employees based on their contribution to the performance of the Company, relative position in the organization, and length of service under the supervision and approval of the Committee.

The grant, vesting and other scheme details would be formulated from time to time.

These long-term reward schemes are implemented to attract and retain key talent in the industry.

2. Minimum remuneration to Managing Director/ Chief Executive officer

If, in any financial year, the Company has no profits or its profits are inadequate, the Company shall pay remuneration to its Managing Director in accordance with the provisions of Schedule V of the Companies Act, 2013 and if it is not able to comply with such provisions, with the previous approval of the Central Government.

C. Remuneration/ Setting Fees / Commission to Non-Executive / Independent Directors

1. Remuneration/ Setting Fees / Commission

The remuneration payable to each Non-Executive Director is based on the remuneration structure as determined by the Board, and is revised from time to time, depending on individual contribution, the Company's performance, and the provisions of the Companies Act, 2013 and the rules made there under.

The remuneration to the Non-executive Directors (including Independent Directors) may be paid within the monetary limit approved by shareholders, subject to the limit not exceeding 1% of the profits of the Company computed as per the applicable provisions of the Companies Act, 2013.

Non-Executive Directors/ Independent Director shall be paid a Setting Fees / Commission as may be decided by the Board of Directors from time to time subject to the limits specified in Companies Act, 2013 and other applicable laws/ Regulations.

2. Stock options

The Independent Directors shall not be entitled to any stock option of the Company.

Policy review

This policy is framed based on the provisions of the Companies Act, 2013 and rules there under and the requirements of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 with the Stock Exchanges.

In case of any subsequent changes in the provisions of the Companies Act, 2013 or any other regulations which makes any of the provisions in the policy inconsistent with the Act or regulations, then the provisions of the Act or regulations would prevail over the policy and the provisions in the policy would be modified in due course to make it consistent with law.

This policy shall be reviewed by the Nomination and Remuneration Committee as and when any changes are to be incorporated in the policy due to change in regulations or as may be felt appropriate by the Committee. B. P. CAPITAL LIMITED

Annexure “B” to the Independent Auditor’s Report of even date on the Financial Statements of B. P. CAPITAL LIMITED.

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”)

We have audited the internal financial controls over financial reporting of **B. P. CAPITAL LIMITED** (“the Company”) as of March 31, 2017 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management’s Responsibility for Internal Financial Controls

The Company’s management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors’ Responsibility

Our responsibility is to express an opinion on the Company’s internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the “Guidance Note”) and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2017, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

- **Use of estimates**

The preparation of financial statements in conformity with Indian GAAP requires the management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities, at the end of the reporting period.
